## CLAIMS

- A ubiquinone supplementation food which is obtainable by adding a composition
   containing ubiquinone and an oil/fat.
  - 2. The ubiquinone supplementation food according to Claim 1,

which contains 0.001 to 50% by weight of ubiquinone 10 based on the total weight of the food.

3. The ubiquinone supplementation food according to Claim 1 or 2,

which contains 0.01 to 50% by weight of ubiquinone 15 based on the total weight of the oil/fat.

4. The ubiquinone supplementation food according to any one of Claims 1 to 3,

wherein the oil/fat has a melting point of not lower 20 than 20°C.

5. The ubiquinone supplementation food according to Claim 4,

wherein the composition containing ubiquinone and an oil/fat is obtainable by dissolving ubiquinone in the oil/fat having a melting point of not lower than 20°C under heating, and solidifying or plasticizing the obtained mixture, or preparing the obtained mixture into an oil-in-water emulsion or a water-in-oil emulsion.

30

35

6. The ubiquinone supplementation food according to any one of Claims 1 to 3,

wherein the oil/fat has a melting point of below 20°C.

7. The ubiquinone supplementation food according to

Claim 6,

wherein the composition containing ubiquinone and an oil/fat is obtainable by dissolving ubiquinone in the oil/fat having a melting point of below 20°C under heating, and preparing the obtained mixture into an oil-in-water emulsion.

8. The ubiquinone supplementation food according to any one of Claims  ${\bf 1}$  to  ${\bf 7}$ ,

which is at least one species selected from the group consisting of edible oils/fats, milk, dairy products, sauces, breads, pies, cakes, confections, roux, seasoning liquors, ice confections, noodles, processed foods, boiled rice preparations, jams, canned foods, and beverages.

15

5

9. The ubiquinone supplementation food according to any one of Claims 1 to 8,

which further contains an antioxidant and/or an edible color.

20

25

10. The ubiquinone supplementation food according to Claim 9,

wherein the antioxidant and/or edible color is at least one species selected from the group consisting of ascorbyl palmitate, ascorbyl stearate, catechin, lecithin, tocopherol, tocotrienol, lignan, and carotenoid.

11. An edible oil/fat composition which contains ubiquinone.

30

12. The edible oil/fat composition according to Claim 11,

which contains 0.01 to 50% by weight of ubiquinone based on the total weight of the oil/fat composition.

35

13. The edible oil/fat composition according to Claim 11 or 12,

which further contains an antioxidant and/or an edible color.

5

10

30

14. The edible oil/fat composition according to Claim 13,

wherein the antioxidant and/or edible color is at least one species selected from the group consisting of ascorbyl palmitate, ascorbyl stearate, catechin, lecithin, tocopherol, tocotrienol, lignan, and carotenoid.

- 15. A process for producing a ubiquinone supplementation food
- which comprises dissolving ubiquinone in an oil/fat under heating, and adding the obtained mixture to a food material.
- wherein the oil/fat has a melting point of not lower than 20°C, and the mixture to be added to a food material is obtainable by dissolving ubiquinone in said oil/fat under heating, and solidifying or plasticizing the resultant, or preparing the resultant into an oil-in-water emulsion or a water-in-oil emulsion.
  - 17. The process according to Claim 15, wherein the oil/fat has a melting point of below 20°C, and the mixture to be added to a food material is obtainable by dissolving ubiquinone in said oil/fat under heating, and preparing the obtained mixture into an oil-in-water emulsion.
- 18. A ubiquinone supplementation food35 which is obtainable by the process according to any

one of Claims 15 to 17.

- 19. A method for preventing precipitation and/or localization of ubiquinone in a food
- which comprises producing a food by dissolving ubiquinone in an oil/fat under heating and adding the obtained mixture to a food material.
- 20. The method according to Claim 19,
  wherein the oil/fat has a melting point of not lower
  than 20°C, and the mixture to be added to the food material
  is obtainable by dissolving ubiquinone in said oil/fat
  under heating, and solidifying or plasticizing the
  resultant, or preparing the resultant into an oil-in-water
  emulsion or a water-in-oil emulsion.
- 21. The method according to Claim 19, wherein the oil/fat has a melting point of below 20°C, and the mixture to be added to the food material is obtainable by dissolving ubiquinone in said oil/fat under heating, and preparing the resultant into an oil-in-water emulsion.
- 22. A method for supplying ubiquinone
  which comprises ingesting the food according to any one of Claims 1 to 14 or 18.
